Specifications are subject to change without notice.

*1 Ink droplets can be placed with a pitch of 1/4800 inch at minimum.
*2 Document print speeds are the averages of ESAT (Word, Excel, PDF) in Office Category Test for the default simplex mode, ISO/IEC 24734. Photo print speed is based on the default setting using ISO/JIS-SCID N2 on Photo Paper Plus Glossy II and does not take into account data processing time on host computer. Print speed may vary depending on system configuration, interface, software, document complexity, print mode, page coverage, type of paper used etc.
*3 TWAIN driver (ScanGear) is based on the TWAIN specification V1.9 and requires the Data Source Manager comes with the operating system.
*4 Optical resolution is a measure of maximum hardware sampling resolution, based on ISO 14473 standard. Optical resolution scan is available only when you use TWAIN Driver.
*5 Copy speeds are the average of sFCOT and sESAT, ISO/IEC 29183. Copy speeds (ADF) are ESAT of copy in sequence, ISO/IEC24735.
Copy speed may vary depending on document complexity, copy mode, page coverage, type of paper used etc. and does not take into account warm up time.
*6 Operation can only be guaranteed on a PC with a pre-installed Windows 7 or later.
*7 When copying ISO/JIS-SCID N2 (printed by inkjet printer) on A4 size plain paper using default settings.
*8 Page yields may vary depending on content coverage, print settings, temperature, humidity, and frequency of printing. Package contains GI-71 (Black, Cyan, Magenta and Yellow) ink bottles.
*9 Declared yield value is the estimated value based on Canon individual test method using the ISO/IEC 24712 colour chart and continuous printing simulation with the replacement ink bottles after initial setup. The colour yield is based on 1 set of composite colour bottles.
*10 The Economy mode reduces the ink consumption by lowering the density. More pages can be printed using this mode.
*11 Declared yield value is the estimated value based on Canon individual test method using the ISO/IEC 29103 chart and continuous printing simulation with the replacement ink bottles after initial setup. Black ink is not used when printing under this condition. However, a minimal amount of black ink is used for maintenance purposes.
